REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Rutten et al., Sekita et al. and Kuroyanagi all show image forming and binding systems for producing a booklet of a document file with an image forming apparatus, a sheet receiving device including a sheet size detect device, a folding device configured to fold a full-size sheet and not to fold a half size- sheet folding, and a binding device as required by the claims.

However, Rutten et al. Sekita et al. and Kuroyanagi do not have directly conveying devices configured to guide the received sheet conveyed by the sheet receiving device so as to be further conveyed by the folding device without being folded by the folding device when the received sheet has been detected by the sheet size detect device of the sheet receiving device not to have the predetermined length in the direction the received sheet is conveyed by the sheet receiving device. Furthermore it would not have been obvious to provide the systems of Rutten et al., Sekita et al. and Kuroyanagi with such a directly conveying device because they employ alternate travel paths for the unfolded sheets rather than conveying the sheet with the folding device without being folded as required by the independent claims of the present invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 3651

Seki, Hirose, and Yoshie et al. all show an image forming and binding systems in which sheets may be folded or unfolded in a fashion similar to that of the present invention.
